PERFORMANCE
AIR COMPRESSOR

WALTHER PERFORMANCE AIR C

Full cartridge. Full power – anywhere.

Walther Performance Air compressors deliver reliable, precision-engineered compressed air – from ultra-compact battery-powered units for on-the-go use at competitions to stationary Eco-Silent models. Developed for elite athletes and built for everyday club training. Maximum independence. Perfectly tuned for peak performance.

- SHORT CHARGING TIMES** Walther Performance Air Compressors fill your compressed air cylinder to the desired 200 bar in a very short time. Once the set pressure is reached, the compressor switches off automatically – safely, quickly, and reliably. Filling time for 130–190 bar: +/- 3 minutes (Performance Air Compressor 400).
- FILTERED AND DRIED AIR** The Walther Performance Air Compressor produces only filtered and dried air. The much-dreaded corrosion problem associated with compressed air cylinders, which often contained moist air due to inadequate treatment, is now a thing of the past. This significantly increases the service life of your cylinder. The compressors operate oil- and water-free and have an automatic temperature shut-off.
- MULTI FUNCTIONAL** Walther Performance Air Compressors provide compressed air whenever you are running low or have run out. And not only at the shooting range or in competition, but also at home and in your leisure time, in the workshop, for your bike or car.
- MULTI-BATTERY PLATFORM** Use the included batteries (400/1400 series) and become independent of the power supply. With plenty of power for your competition – to take with you.
- COMPACT DIMENSIONS** The size comparison speaks for itself: Performance Air compressors impress with their compact design and adapt perfectly to your individual requirements.

Performance Air Compressor 400

The ultra-compact cordless compressor for traveling. It weighs just 6.1 kg and has a powerful 18V battery.

MSRP*
335,29

OMPRESSOR

Performance Air Compressor Eco Silent

The stationary and particularly silent device for home or workshop use.

MSRP*
251,26

Performance Air Compressor 1400

The top model with two powerful 18V batteries. This allows you to fill your cartridge to 190 bar in around 4 minutes.

MSRP*
629,41

Height 28.5 cm

Height 47.0 cm
